Introduction of company

There are more than 30 laser machine types in our factory. We have presented JQ series of laser engraving and cutting equipment for more than 6 years. More than 30 types of laser machines are popular all over the world. JinQiang laser pursues the philosophy of "GOLDEN QUALITY,BEST TECHNIQUE,GOOD FAITH". We are trying to be the well-known company with the perfect and considerate after-sale service.

Materials to machining

Laser equipments are apply to cut and engrave non-metals,such as acryl, organicglass, paper, dual-colour boards, garment, rubber, leather, wool, cloth, fabric, plastic, marble, jade, crystal, ceramics, bracelet, MDF, PVC, wood, bamboo and so on.

Industry to apply

Arts and crafts, bamboo and wood products, hectograph engraving, toys, advertisement, decorating, leather, architecture upholstering, paper industry,costume cloth, boxes and bags, computer, embroider and scissoring, house and furniture, model and mould, electronic and electrical facilities, and so on.

Specifications about JQ laser machines

Laser-type	CO2 laser tube,water cooling	
Laser tube power	25w/30w/40w/60w/80w/100w/130w	
Graphic format supported	BMP, PLT, JPG, DST, DXF, AI	
Software supported	Coreldraw,Photoshop,AutoCAD,TAJIMA	
Working voltage	110 - 220V ± 10%, 50 - 60Hz	
Auxiliary equipments	Cooling system, ventilation system	
CE certification		
Machines		
Laser tube		

<p>Focus lens</p>	
<p>Rails (made in Taiwan)</p>	
<p>Kinfe worktable (optional) (Black,Aluminum alloy and knife are efficient to decrease the laser reflect,suitable for hard materials,such as wood,acryl and so on)</p>	
<p>Honeycomb worktable (optional) (suitable for soft materials,such as rubber,garment and so on)</p>	
<p>Up-down working table</p>	
<p>Automatic water cooling system</p>	

<p>Removes dust the air blower machine</p>	
<p>Rotary system (for bottles and other parallel materials)</p>	
<p>Rotary system (for cups and cylinders)</p>	
<p>Infrared ray indicating Position (optional) (make the beam visible)</p>	
<p>USB feature (optional) (make machine work without computer)</p>	
<p>Wheels (the left wheel is used to fix the machine while the right one to move it)</p>	

Acrylic samples

15mm cutted

20mm cutted

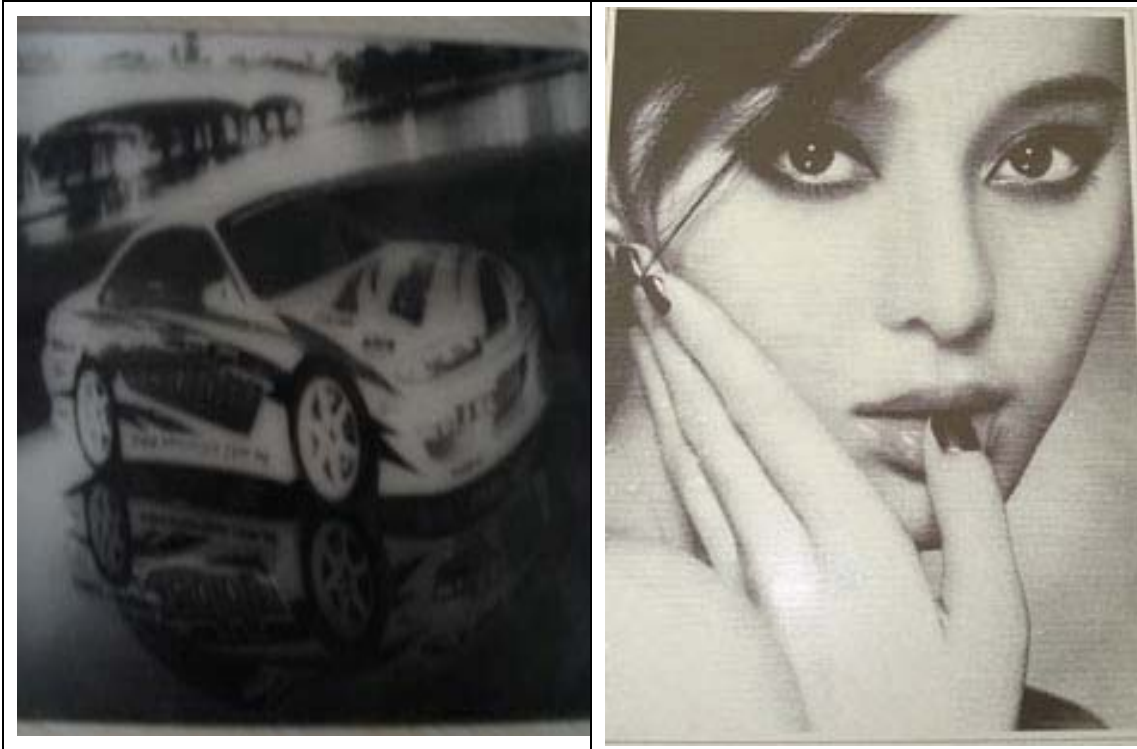

30mm cutted

engraving

Laser machines can cut acrylic 0.1mm--35mm.

Dual-colour boards samples

Wood samples

Glass samples

Bent glass

Plain glass

Bottle

Stone and marble samples

Other samples

Carpet cutted
Bean engraved

Rubber engraved
Garment cutted
